

Paper craft club

Paper Craft Club Creations ✂️🧠

The Paper Craft Club has been busy this term turning simple sheets of paper into amazing creations! Students have enjoyed exploring a wide range of projects that combine creativity, patience, and skill. They began by learning the art of **origami**, making beautiful *flapping cranes*, *jumping frogs*, and *water bombs* that tested their folding precision and design skills.

The club then moved on to more playful and imaginative projects, creating “blind bags” (apparently it is a tik-tok craze?) filled with handmade “squishies”, each one unique and full of personality. They also crafted pop-up cards for special occasions, learning how to use cutting and folding techniques to make their designs come to life. Most recently, students engineered their own paper plane launchers, combining art with science to see whose design could fly the furthest.

The Paper Craft Club has proven that with a little imagination, paper can become just about anything!
