

Celebrating Mathematical Progress Through Century Tech

Secondary students have been making excellent use of the Century Tech platform to support their mathematics learning. In addition to the two mathematics homework tasks set weekly by their teachers, many students are also choosing to use the platform independently. They are doing so either to consolidate their understanding of topics already covered in class or to explore and learn new mathematical concepts.

Students also benefit from immediate feedback on every question they attempt, allowing them to learn from mistakes in real time. The platform currently hosts 58,650 mathematics questions across all ability levels, ensuring there is always more practice available. Across all subjects on Century Tech, there are 181,885 questions in total, and this number continues to grow rapidly each day.

Century Tech offers short, focused mini-lessons known as “nuggets.” Each nugget provides students with access to explanatory videos and slideshows on a specific topic, followed by a diagnostic test. Using artificial intelligence, the platform analyses students’ responses and identifies areas of strength and improvement. Based on this analysis, Century Tech recommends additional nuggets that are tailored to each student’s ability level. This ensures that every learner follows a personalised mathematics pathway that is completely unique to them.

CENTURY TECH MATHEMATICS SUPERSTARS

YEAR 7

All eleven students in the class have answered over 1,000 mathematics questions. Well done, Year 7.

The following students have answered more than 2,000 questions:

- **Anaya Kalombo** – 2,450
- **Aaron Kayamani** – 2,131
- **Lwise Mlaki** – 2,107

Special mention:

Giovanna Mwankemwa has spent 25 hours on the platform in her spare time. A great effort.

YEAR 8

Two students have answered over 1,000 mathematics questions:

- Asante Motcho** – 1,056
Maria Sapia – 1,026

YEAR 9

Four students have answered over 1,000 mathematics questions:

- **Malkia Mushi** – 1,780
- **Michelle Katabaro** – 1,425
- **Wapelo Mooketsi** – 1,317
- **Bernard Njau** – 1,158

YEAR 10

Extended Mathematics Group

Fourteen out of fifteen students have answered more than 1,000 mathematics questions, which is an excellent achievement.

The following students have answered more than 2,000 questions:

- **Aisia Kirei** – 2,130
- **Hayaam Nassor** – 2,019

One student has answered over 3,000 mathematics questions:

- **Sabrina Kilumanga** – 3,187

One student has answered over 4,000 mathematics questions so far:

- **Shannen Kiiza** – 4,264

Shannen has also spent more than 35 hours on the platform answering mathematics questions. Congratulations on being number one.

CENTURY TECH MATHEMATICS SUPERSTARS

YEAR 11

Four students have answered more than 1,000 mathematics questions:

- **Lisa Dindi** – 1,569
- **Heri Mgomella** – 1,242
- **Katalina Nalwadda** – 1,086
- **Brilliant Mwalusamba** – 1,066
