Braeburn Schools Recycling Report

April 2026

Monthly Recycling

Recycled Materials in Numbers

1,379 = 40 kg

of Plastic Bottles Recycled

196 = 110 kg

of Glass Bottles Recycled

30 kg

of Cardboard Recycled

32 kg

of Paper Recycled

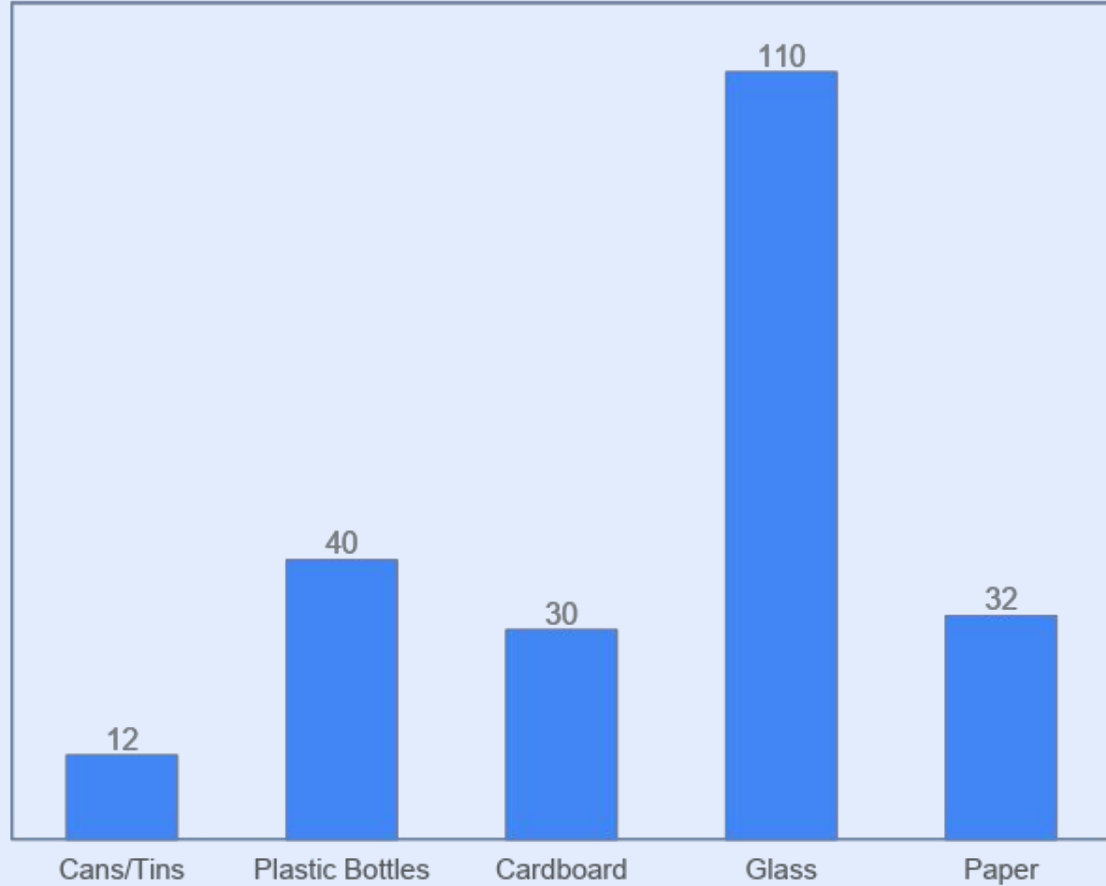

343 = 12 kg

of Cans/tins Recycled

Recycling in kilograms

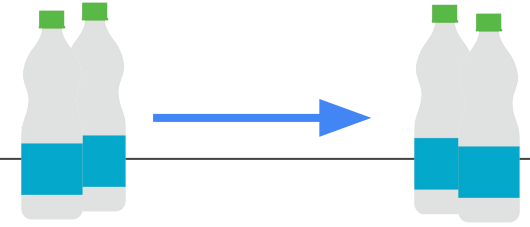

Recycling Facts

All cardboard and paper were recycled into toilet paper rolls, brown paper, and envelopes with a local manufacturer.

- Paper products omits serious amounts of methane when placed in a landfill to decay.
- Recycling just 1 ton of paper saves about 17 trees
- Recycling paper instead of using virgin material saves 50% water, has 74% less air pollution and 60% less energy

Plastic bottles are baled, shredded, washed, pelletized and made back into plastic bottles here in Tanzania.

- Recycling plastic produces up to 70% less CO₂ than making new plastic and uses 66% less energy.
- Recycling just 1 plastic bottle saves the equivalent energy to power a laptop for 2.5 hours
- Recycling keeps bottles out of landfills and waterways, where they can take 450+ years to decompose and pose serious threats to wildlife.

Cans went to a local company that will melt it down into new metal products like steel frames and bars.

- Making new cans from recycled aluminum uses 95% less energy than from raw materials.
- One recycled can saves enough energy to power a television for 3 hours.
- Producing recycled aluminum emits 95% less greenhouse gas than new aluminum.

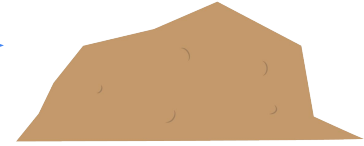

Glass went to a local manufacturer that crushes the glass and reheats it to make new bottles. These bottles are used for local beer brands like Kilimanjaro and Serengeti as well as Coca-Cola and Pepsi.

- Glass is infinitely recyclable without losing purity or quality - can be recycled again and again
- Glass that ends up in landfills will never decompose - ever!
- Each ton of recycled glass saves over 1,300 pounds of sand, 410 pounds of soda ash, 380 pounds of limestone and 30% of the energy needed to make new glass from raw materials

Recycling Impact

Since becoming a Recycler in May 2022, your company recycled

5,597 Kgs of Waste

Recycling equivalent **30,379** plastic bottles

Recycling equivalent **4,518** glass bottles

Recycling equivalent **8,657** cans

Recycling of cardboard and paper has saved **32** trees

Recycling plastic has saved the equivalent of **47** barrels of oil

Recycling has saved the equivalent of **16** tons of CO₂

Recycling has saved **31 m³** of landfill space

Recycling has saved **49,578** liters of water
